

# Seller Report Template

---

Previously, I discussed the Seller Report tab in a Property. Today, I will show how to use information in that tab within a template and a workflow.

We've designed Realvolve with special merge fields for updating sellers on the actions taken to market and sell their property. Take 6 minutes to watch the video ( [SEE VIDEO](#)) on creating a template, using checklists and actions to automate the entire process.

The 3 special merge fields for seller report are listed below:

- [[Property#SellerReport]] - All Seller Report Items in List
- [[Property#SellerReport-SentOnly]] - Seller Report Items Previously Sent
- [[Property#SellerReport-NonSentOnly]] - Seller Report Items Not Already Sent

**NOTE:** For the example email we used the **NonSentOnly** merge field so that each time we email the seller they only get the Seller Report information that we have not already sent (only the new entries). The key concept is to understand that you are able to make small comments in the seller reports area and update your seller on a regular basis using workflows.

**TIP:** The video shows sending the weekly report to the seller manually. However, if you have the automated emails setup then the email to the seller can be sent automatically at the appointed time.

When using the **Showings** options and assigning contacts to the property, additional contact merge fields can be used to send similar types of information. These merge fields are available for templates that have the "Use With" set to **Contact**.

- [[Contact#ShowingReport]] - All Showing Items in list
- [[Contact#ShowingReport-SentOnly]] - Showing Items Previously Sent
- [[Contact#ShowingReport-NonSentOnly]] - Showing Items Not Already Sent
