

# OnBoard Day 9 - Contact Connections

---

The upper right corner of each contact has 6 icons which allow you to communicate with your contact through different social media networks. If the Social Network connections are set up and the Social Network Connection field for that social network has been entered, then the icon will be in a dark gray state that you can use that method of communication. Click on the dark gray icon to send a message through Facebook, Twitter, LinkedIn, Email and SMS Texts. The Elephant icon is for connecting an Evernote notebook to a Realvolve contact. When you setup a notebook connection, the notebook will be saved in the Evernote field under the Connections section for that contact.

**Note:** Only one Evernote notebook can be connected to a contact at a time.

---

To visit the social media website for the contact, click on the Connection icon located in the Contact tab. The example above shows where to click when visiting the contact's Facebook page. Each icon in the Connections section will take you to the associated website indicated.
